## Special Finishes Description

**32DMS** (MicroShield®): As part of its promise to provide innovative solutions to their customers, ASSA ABLOY Group companies offer the MicroShield® technology, a silver-based antimicrobial coating designed to inhibit the spread of germs and bacteria.

**32316** and **32D316** are made from alloy 316 stainless steel containing molybdenum and extra nickel giving it substantially higher corrosion resistance than the standard stainless steels typically used in door hardware. This finish is ideal for use in coastal, urban, and industrial areas that have harsh environmental conditions. **32316** (polish) finishes offer the best corrosion resistance and should be used in caustic environments.

**10BE** Dark Oxidized Satin Bronze equivalent: This finish provides the richness and warmth of the 10B/613 "living" finish, but maintains its original color and appearance and will not fade or wear over time. The 10BE finish is offered by Corbin Russwin, McKinney, Norton, Rixson, Rockwood, SARGENT and Yale, providing visual consistency between ASSA ABLOY Group brands.

\* On most bronze finishes we will supply solid bronze material. Where solid bronze material is not available, we will use brass as a base material with a bronze look powder coat in its place.  
\*\*\* Available on select items as indicated by the finish icon throughout the catalog.

MicroShield® is a registered trademark of Yale Security Inc., an ASSA ABLOY Group company.

## Push and Pull Bar Mounting Details

### Sizing of Push Bars

#### Flush Doors

- Door width: • minus 5" for bent end bars  
 • minus 5" for square end post mount bars  
 • minus 7" for round end post mount bars

#### Stile and Rail Doors or Doors with Lites

- Door width: • minus width of one stile

CAUTION: Always confirm bars will not interfere with jamb or cause pinching hazard.

CAUTION: On narrow stile doors, be sure push bar base fits on the stile and bar does not interfere with the stop.

### Handing of Doors

The handing of a door is determined from the outside of the opening.

Standing outside the door:

- If the hinges are on the right, it is a right hand door.
- If the hinges are on the left, it is a left hand door.
- If the door opens away from you, it is a regular bevel door.
- If the door opens toward you, it is a reverse bevel door.
